AMIS

I am interested in exploring 3d modeling skills for this semester.

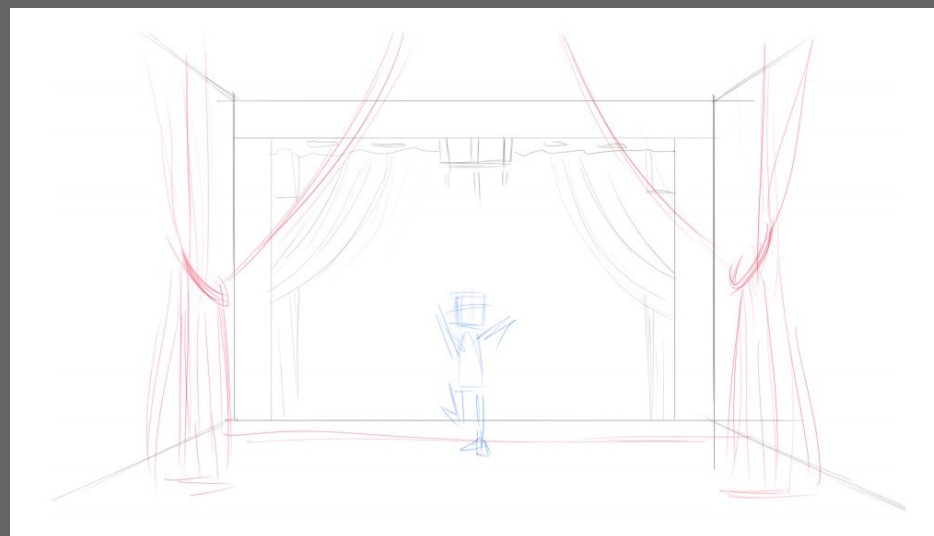

For this project, I try to integrate 2D character and 3d environment to make a series of mix media animation/hybrid animation which contain four short animation, each of them is around 4 seconds.

Taking the Qing Dynasty of China as the background and try to present the nation's appreciation of beauty by depicting the creepy image of 'beauty' at that time. It also make reflection on our current aesthetic, whether it shaped by the time or others.

3D environment

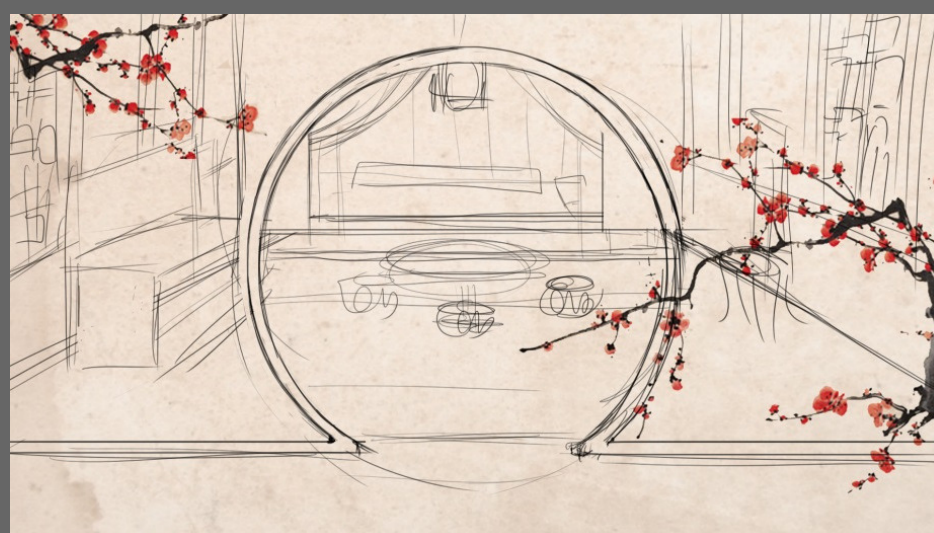

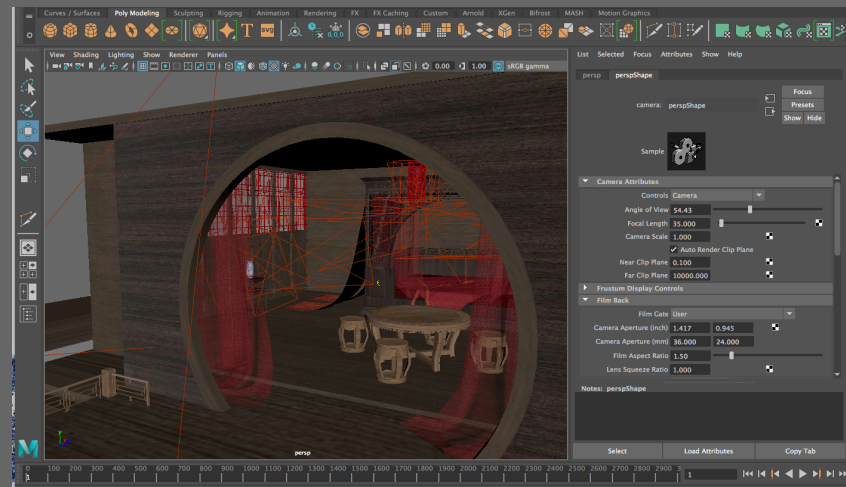

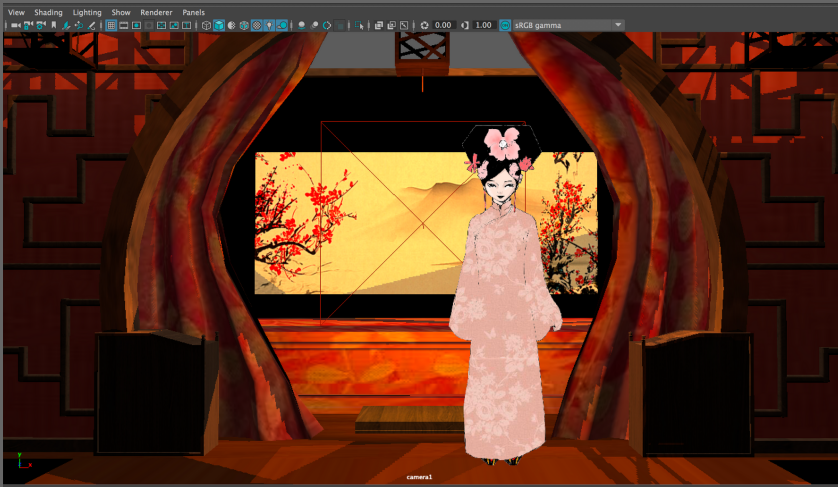

Using Maya to created the 3D environment which is a woman's bedroom.

SKETCH

- *Background design*

DEVELOPMENT

- *Testing*
- *Modeling*
- *Lighting*
- *Rendering*
