Fantastic Beasts and Where to Find Them

Fantastic beasts is one of my favorite movies, the main character in this movie is called Scamander who travel from the UK, arriving in New York carrying a strange suitcase filled with magical creatures, that accidentally ends up being switched with someone else' s. And the creatures are soon unleashed upon the street of New York, so Scamander have to find them and catch them as well as fight with the US authorities.

I think the most attractive part of this movie is the creature design, especially in Fantastic beasts 2 a creature called Zou wu. Zou wu is an ancient Chinese legend beast. It is a very precious animal with colorful patterns and long a tail of the State of Lin in the Legend. It looks like a tiger, but does not eat live animals and poultry, Zou wu can walk very well, it can ride a thousand miles a day. And in the movie the design of Zou wu is very impressive. I think it combine some new idea with the original one and create a unique new Zou wu. Also the movement of Zou wu in the movie is flowing which I can use as a reference in my folio work as well.
