## Week 1 tinkering

. I took some photo of my home and family and download some pictures in the internet. I edit them together with a funny music. It gives me a chance to think about how to use totally different visual elements to tell a certain scene that makes sense.

## Week 2 materiality

. I took a video of the oven in my house and try to draw a simple animation to explosion. It is to make animation to meet the real world things. I learn to find the possibility of animation creation in the very simple daily life.

## Week 3 observation.

I study some high speed camera videos of human and animal runs. Then I try to use these learning experience to make my own animation better.

#### Week 4

I use my family's photo to create a comic painting. The characters are from the over watch. And I recorded the process into a video.

#### Week 5

I am trying to edit my different works together to make a showreel. It is interesting to put different animation and drawing together and look for the logic among all the elements.
