LEAVING THE GRID

By RubenFro

The VFX in the video has been one of the most stunning effects I have seen made by Unity, adding a mysterious atmosphere to the music.

A night street scene featuring a car with its headlights on, moving through a dark environment. The scene is illuminated by vibrant, multi-colored light trails in shades of red, green, and blue, which appear to be the result of a long-exposure photograph or a digital effect. The background shows the dark silhouettes of buildings and trees, with some ambient light reflecting off the wet pavement.

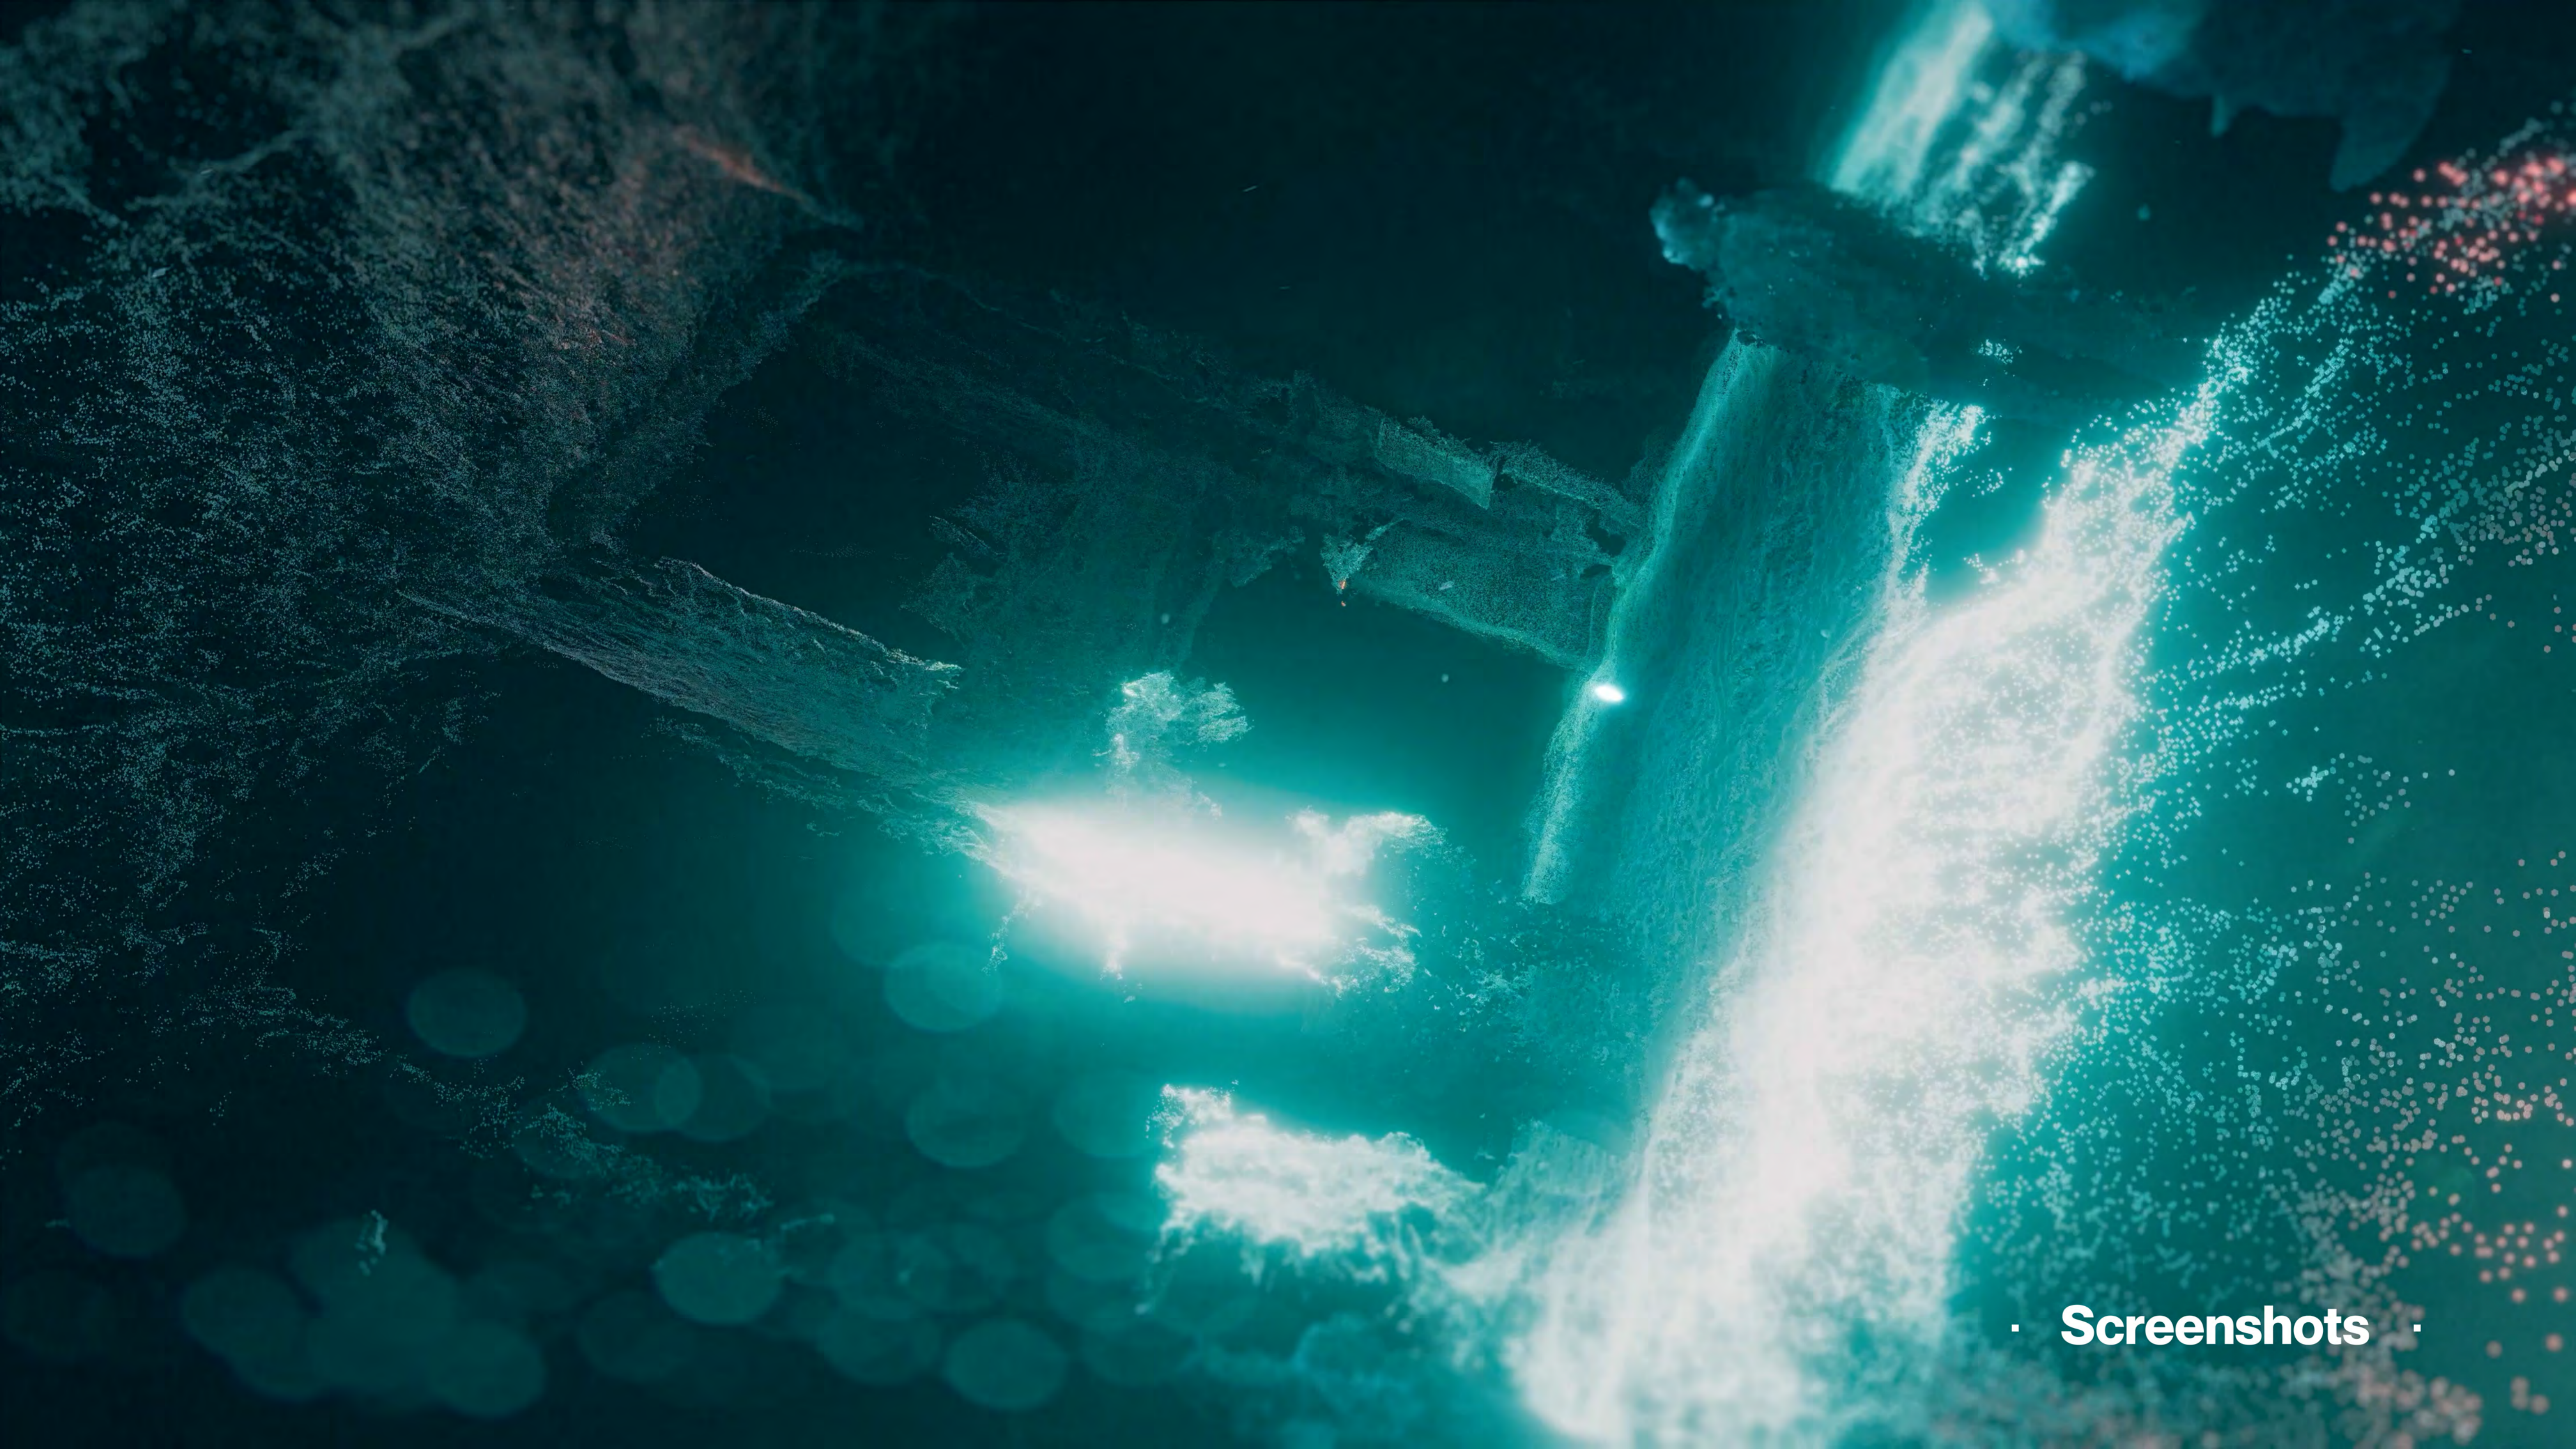

The actions in the video fit perfectly with the timing, leading the audience step by step towards the further scenery of the street.

RubenFro is known for their real-time rendering with the effect of dissolving reality using Unity in the industry.
