<div class="section-4 box">
<h1>Annotation</h1>
<p>
In response to the theme of Tinkering, I tried creating a concept of compact space. To do so, I decided to experiment with Cinema 4d, so I created my model in Cinema 4d and took the model to maya and animated it there. I have created 2 flat renders and a video for this week's response. By doing so, I tried to imagine and convey my own idea of a compact space of a capsule. I created a full-fledged house inside a capsule. I drew my inspiration from the ongoing coronavirus pandemic where everyone is staying inside their houses to keep themselves and others safe. The house in this case is everybody's protective layer or a capsule (medicine) to protect them from this pandemic. I also researched a bit before creating this project and drew my inspiration to create the interiors from one of the posts at the artstation website.
