Following are some of the futuristic technologies that I researched about and I am going to include in my project. I am planning to work on 3-4 of these.

I. Neuralink

Neuralink is an American company founded and developed be Elon Musk. This company develops implantable brain machine interfaces.

More Information: https://en.wikipedia.org/wiki/Neuralink

2. Automated cars and flying cars

Automated cars are said to be our future. The cars we will have in the future are going to be self-driven.

More Information: https://interestingengineering.com/15-futuristic-cars-we-cannot-wait-to-see-on-the-road

Flying cars will also be a reality soon in this world. There are many under development and are said to be ready in another 20 years.
